

PLATO Learning Solutions

Response-to-Intervention

PLATO Learning Response to Intervention solutions help teachers monitor and individualize instruction for students who fall into one of three tiers of the RTI model by using PLATO online curriculum, assessments and reporting.

PLATO Response to Intervention Solutions

For students at risk for below-grade learning outcomes, Response to Intervention is key to identifying and addressing individual needs before referral to special education. PLATO Learning provides self-paced, personalized instruction to accommodate the three-tier RTI model. We offer standards-aligned curriculum and diagnostic assessments that are developmentally and age appropriate.

RTI Solutions Overview

Response-to-Intervention solutions offer a range of instructional strategies for use in RTI programs, and we have assessments that provide useful insights for making important data-driven instructional decisions. This enables you to identify learners who are at risk, monitor progress, plan evidence-based interventions, and know how to adjust the interventions based on unique needs.

Technology-driven, standards-based online curriculum provides a rigorous program delivered to students for anytime, anywhere access. PLATO Learning has nearly 200 courses with 10,000 of hours of content in language arts, mathematics, science, social studies and electives. When you are considering online curriculum, consider the depth of research and breadth of scope offered by PLATO courses.

Test Packs with Prescriptions

Students are held to a number of educational standards each year. PLATO Test Packs with Prescriptions provide grade-level fixed benchmark assessments for grades 2-12 in reading and mathematics, grades 7-12 in writing and social studies, and grades 7-11 in science.

PLATO Test Packs then provide personalized, prescriptive assignments to PLATO® courses, targeting each student's specific areas of need. Test Packs provide cumulative, comparable test versions which automatically adjust instruction over time to track student progress against standards.

PLATO Learning is a leading provider of high-value, comprehensive online solutions that support educators in their mission to successfully transition learners and advance learner achievement.

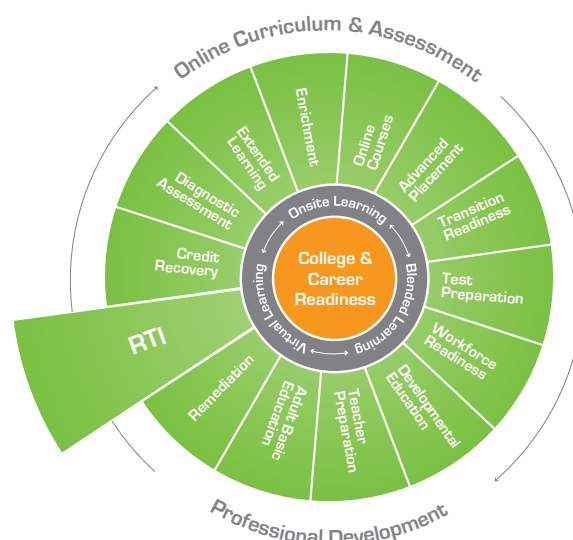

Test Packs give teachers the flexibility to choose to have automatic prescriptions assigned or to make manual adjustments themselves before assigning lessons. Consistent alignment between test items and PLATO curriculum assures that each learner receives an individual learning path.

State-specific Test Packs are available for 33 states and are based on key objectives within state content and curriculum standards. The National Test Packs are designed using NCTE and NCTM standards, as well as standards from the Thomas B. Fordham Foundation index of "A" states, and include reading, writing, mathematics, science, social studies, the Stanford 10, ITBS, and TerraNova.

Accucess

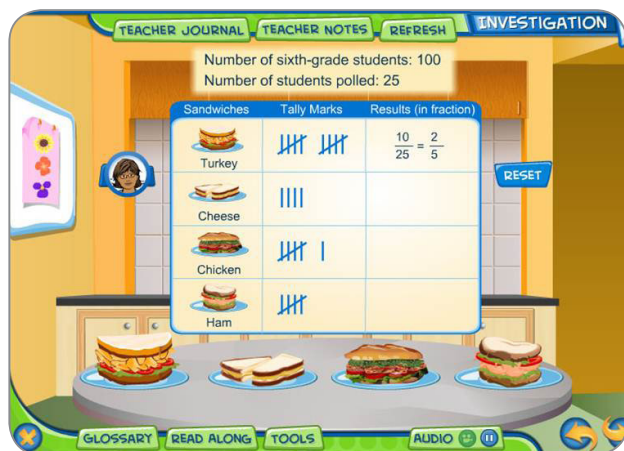

Accucess is PLATO Learning's newest online diagnostic assessment solution. This innovative, formative adaptive assessment allows educators to quickly and efficiently place students on grade level in Reading, Writing, and Math. In addition to the assessment, learners are prescribed PLATO Learning's rigorous online curriculum to fill learning gaps and personalize learning for individual students or an entire class.

Educators can use Accucess to evaluate student knowledge and skills before beginning an instructional unit or semester, with results used to determine areas of special emphasis and focus.

Comprehensive Support Services

In addition to industry-leading solutions, when you partner with PLATO you get a comprehensive support network of dedicated experts that ensures a successful implementation of your solution. And as it evolved, we're here to help you maximize the value and effectiveness of your online program with curricular and technical expertise, and the industry's only certified Center of Excellence phone support center.

PLATO RTI solutions help you optimize the learning experience for at-risk students and create an environment in which you can intervene early and effectively, giving them the best opportunities to succeed.
